Onsite Training

The support staff can visit your site to provide services such as;

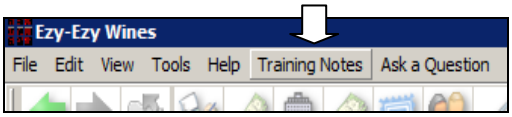
- Train new staff
- Address any double entry
- Improve efficiency
- Implement modules not utilised.

Convert Mailing List To $

We can assist you in converting your mailing list to a wine club.

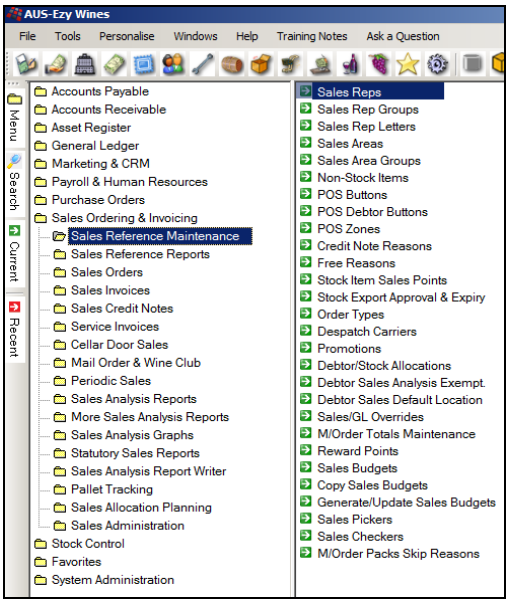
Website Sales Interface

If clients can maintain their details and/or purchase wine on your website, these activities can be synchronised to update *EzyWine* automatically as explained in **Wine Club** training notes.



EzyAccounts.NET

The new version of ***EzyAccounts*** is now available for those clients only using the accounting modules, such as wine distributors.



Debtor Payments By BPAY

System parameters to record company BPAY billing code and reference prefix have been introduced and can be included on stationery such as Debtor statement and sales dockets using the Stationery Designer.

Super Increasing To 9.5%

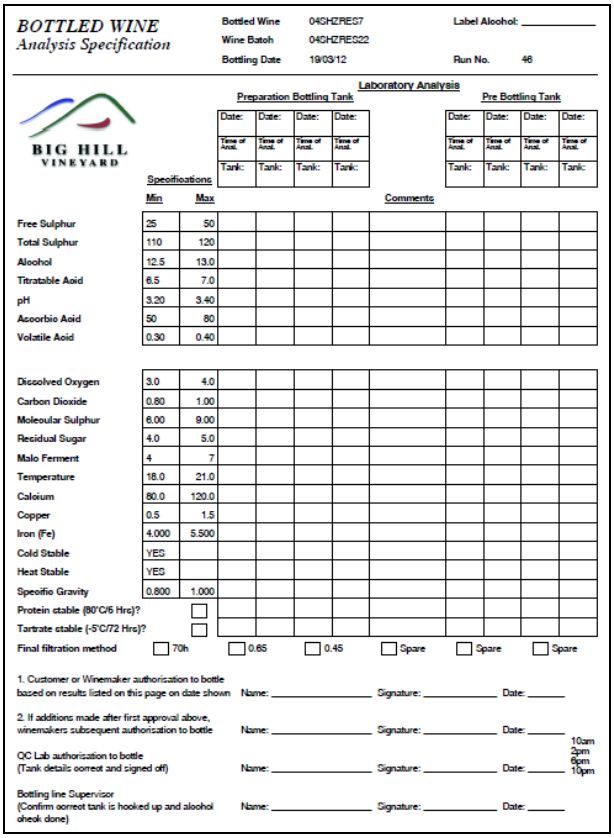
The **May Upgrade will need to be installed** to ensure that the employer super contribution is correct for new financial year in Australia.

POS EFTPOS Interface

Connect you POS terminal to your EFTPOS so that payment amount is auto loaded.

Analysis Specification Forms

The Stationery Designer can be utilised to create analysis forms for bulk wine, wine batch and bottled wine.



BOTTLED WINE

Bottling line Supervisor (Confirm correct tank is hooked up and alcohol check done) — Name: _____ Signature: _____ Date: _____

Speed Issues?

If ***EzyWine*** is running slowly, please check that the server has at least 1 gig of RAM for each user. Also check that you are running a terminal server network and not a peer-to-peer mapped drive network. Please contact the support staff at Ezy Systems for more details.

Inhouse Training at Ezy Systems using your data

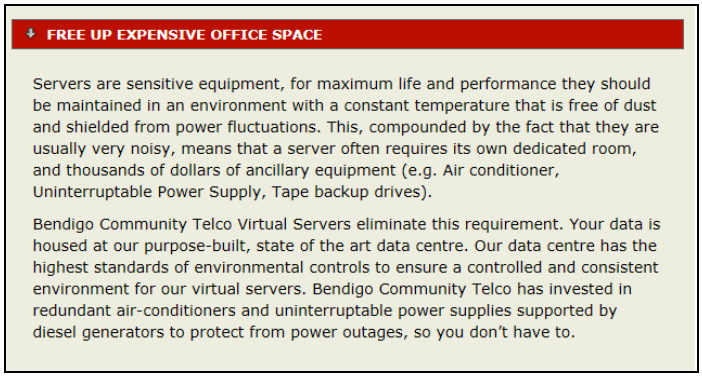
ONSITE

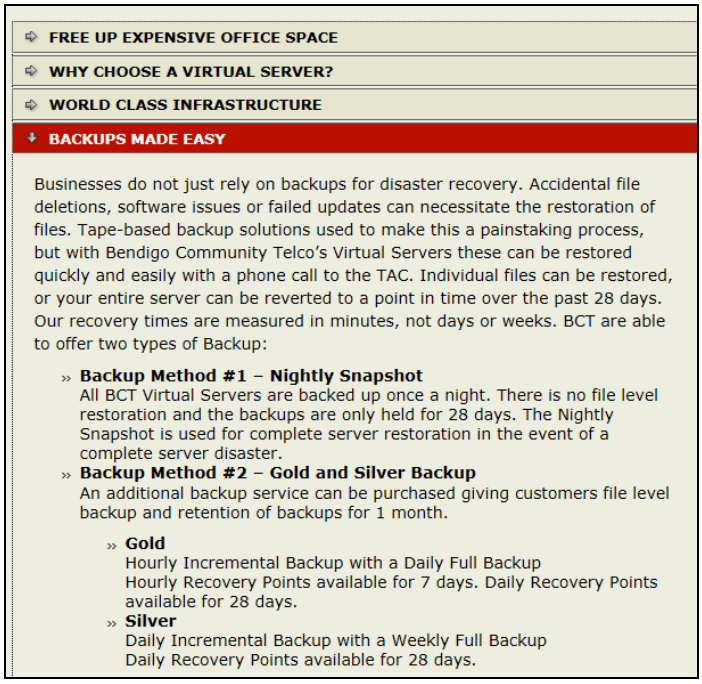
Onsite Training using your data

SEMINARS

Refer to the schedule on the website

TRAINING NOTES





EzyWine.CLOUD

If you are planning to upgrade your server, you may want to consider cloud.

Your copy of ***EzyWine*** will be installed on a virtual server hosted at Bendigo Community Telco, who have the full support and backing of Community Telco Australia and the Bendigo and Adelaide Bank Group.

Peace of Mind

You will no longer need to

- purchase a server for ***EzyWine***
- have to upgrade your operating system
- load ***EzyWine*** upgrades
- wonder whether the backup has been done or whether the data was really backed-up.

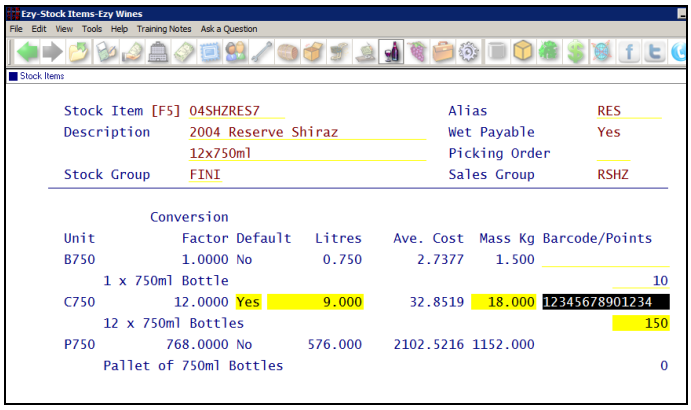
Pricing

Setup Cost
$200 per user.

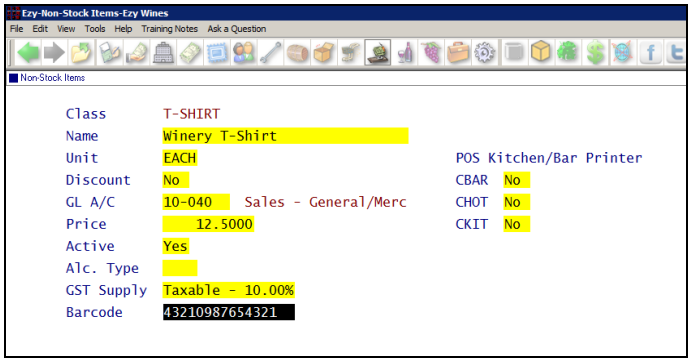
Monthly Fee
$50 per user.

For more details please contact our IT Manager, Adrian Lock on +61 (0)3 5441 2044 or email your questions to **adrian@ezysys.com.au**.

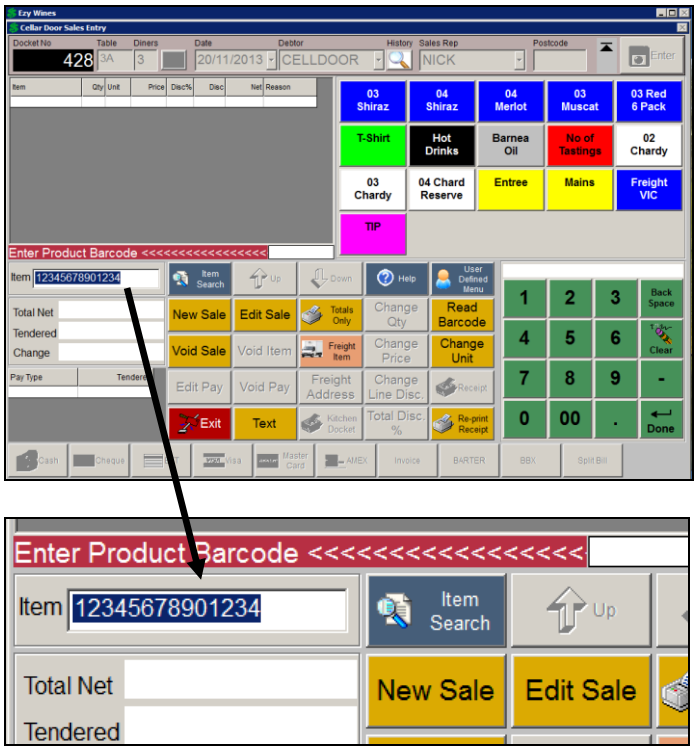
General Tips



Stock Reference Maintenance, Stock Items



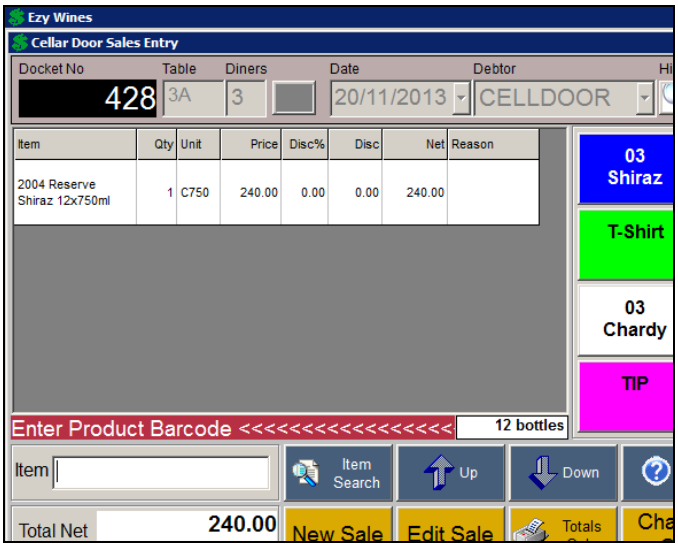
Sales Reference Maintenance, Non-Stock Items

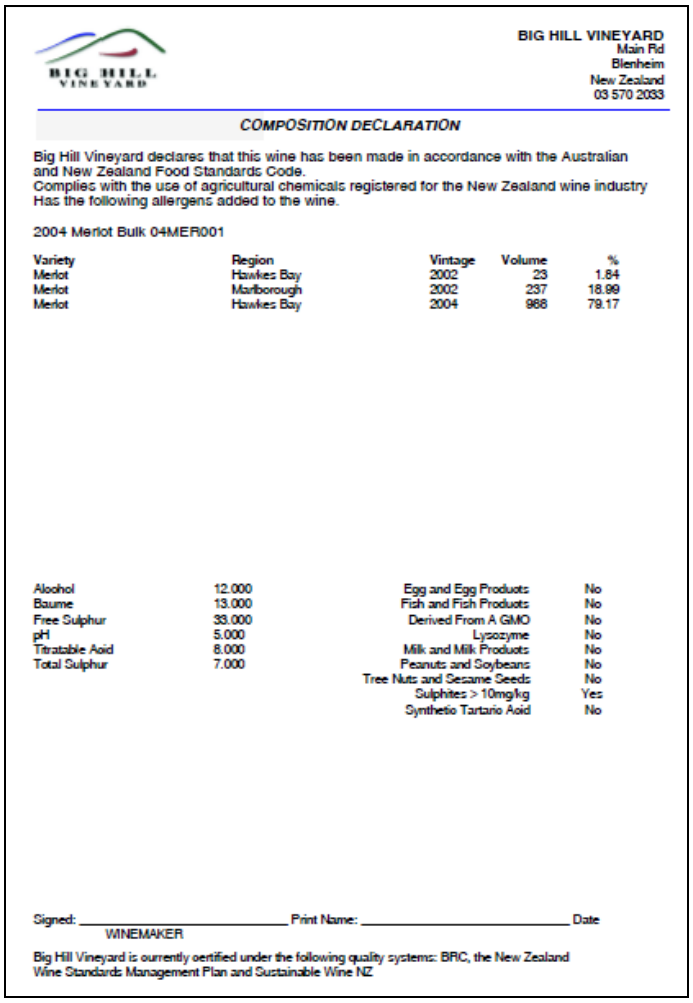


POS Barcode Scanning

If you have barcodes on your cellar door stock items and/or non-stock items, consider setting the following system parameter to Yes.

C/Door: Entry, Use Barcodes





BIG HILL VINEYARD
Main Rd
Blenheim
New Zealand
03 570 2033

COMPOSITION DECLARATION

Big Hill Vineyard declares that this wine has been made in accordance with the Australian and New Zealand Food Standards Code.
Complies with the use of agricultural chemicals registered for the New Zealand wine industry
Has the following allergens added to the wine.

2004 Merlot Bulk 04MER001

Variety	Region	Vintage	Volume	%
Merlot	Hawkes Bay	2002	23	1.84
Merlot	Marlborough	2002	237	18.99
Merlot	Hawkes Bay	2004	988	79.17

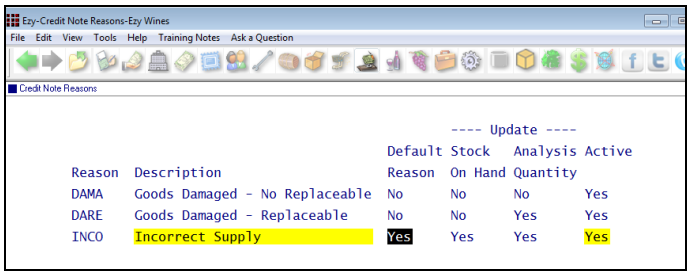
Alcohol	12.000	Egg and Egg Products	No
Baume	13.000	Fish and Fish Products	No
Free Sulphur	33.000	Derived From A GMO	No
pH	5.000	Lysozyme	No
Titratable Acid	6.000	Milk and Milk Products	No
Total Sulphur	7.000	Peanuts and Soybeans	No
		Tree Nuts and Sesame Seeds	No
		Sulphites > 10mg/kg	Yes
		Synthetic Tartaric Acid	No

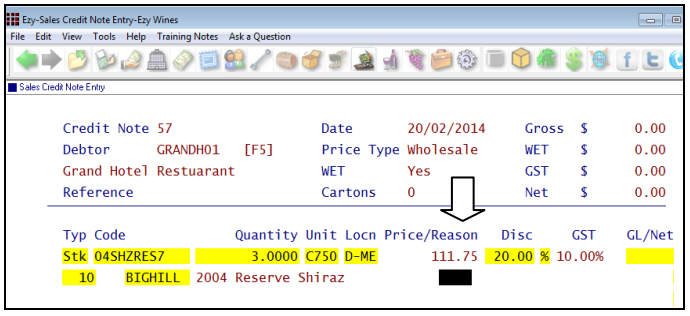
Signed: _____ Print Name: _____ Date
WINEMAKER

Big Hill Vineyard is currently certified under the following quality systems: BRC, the New Zealand Wine Standards Management Plan and Sustainable Wine NZ

Customised LIP Declaration Form

The System Administration, Stationery Designer can be utilised to produce a customised format.

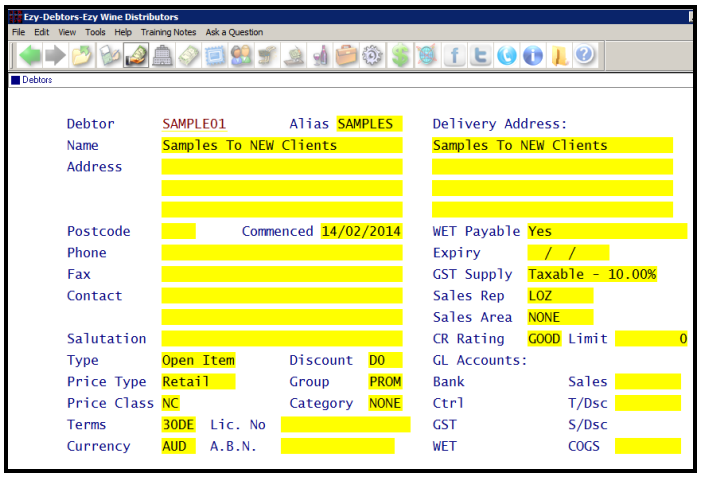


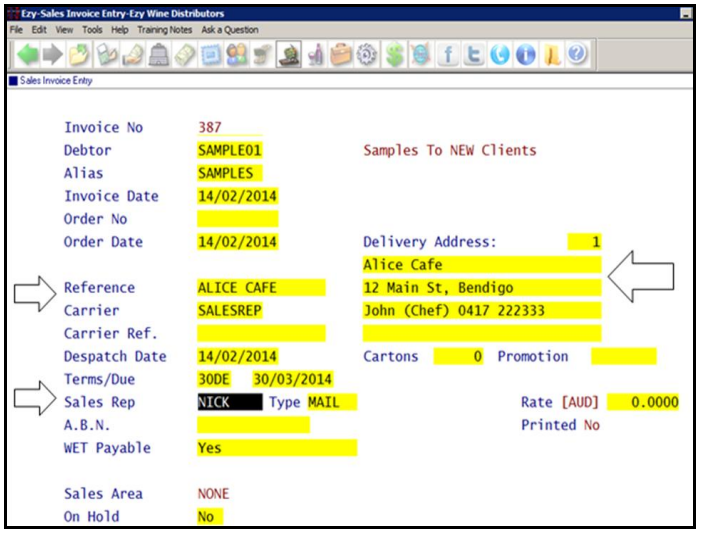


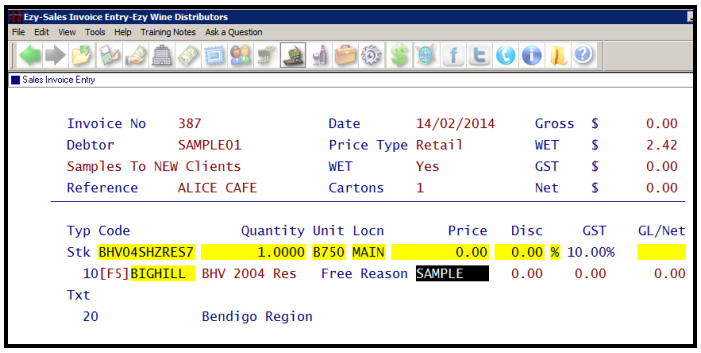
Sales C/Notes: Entry, Use Default Reason

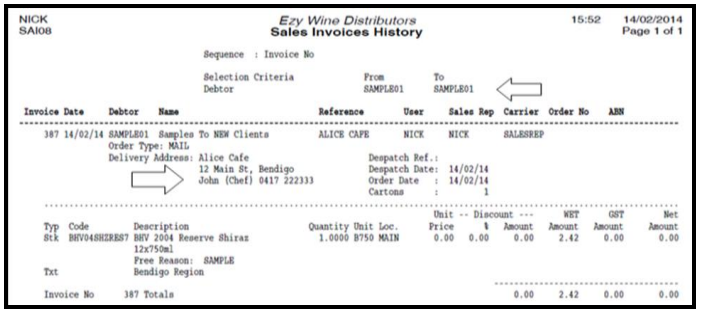
This system parameter determines whether the Sales Credit Note Entry option is to preload the default reason or left blank so that the user must always enter the reason.

It is recommended that this parameter is set to ***No*** so that the default reason is not accidentally used when not applicable.









Tracking Samples To Potential Customers

The following lists the steps required to track samples to a potential customer that you don't want to setup as a Debtor, ensuring that samples impact stock on hand and the GL.

Stock Price
Setup a Price Class with no stock items.

Debtor
Create a Samples Debtor.

Carrier
Create a Sales Rep Carrier.

Free Reason
Create a Sample reason.

Sales Invoice Entry

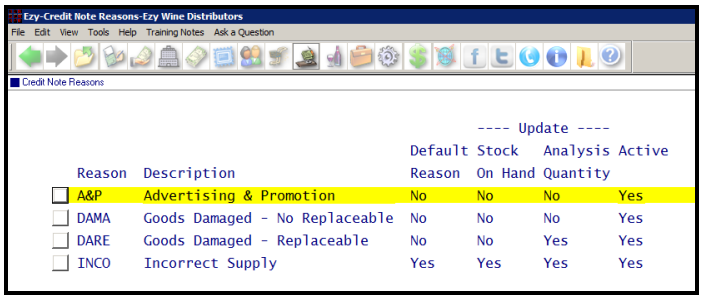
- Select the Samples Debtor
- Record the name of potential client against Reference
- Record the 'SALESREP' carrier
- Record the applicable Sales Rep
- Record full potential customer details against Delivery Address.

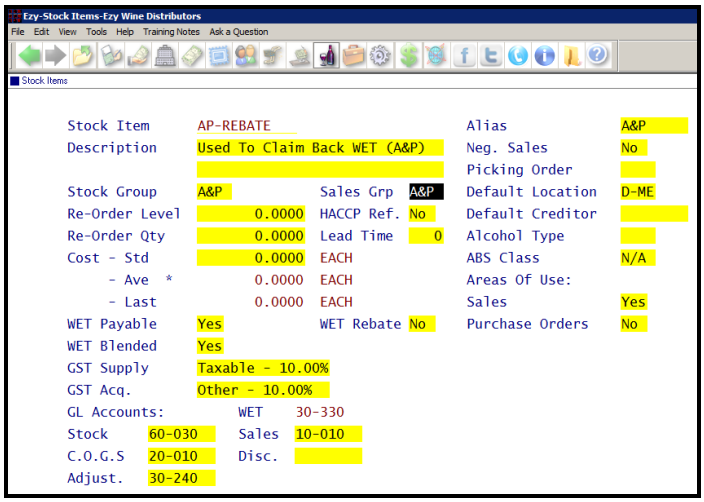
The Stationery Designer can be used to produce a customised Sales Invoice docket with the delivery address at the top of the invoice and linked to the SAMPLES Debtor only.

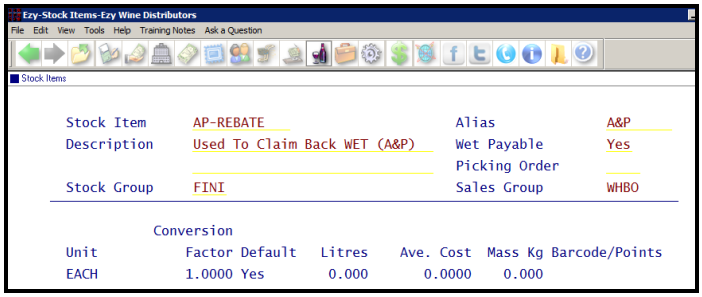
Sales Invoice History

On selecting this report, specify the Sample Debtor *and/or* the potential client as the Reference *and* the applicable Sales Rep on the selection criteria.

General Tips (Cont'd)







Advertising & Promotion (A&P) Rebate Tracking

Usually the A&P rebates are claimed at the end of each month. If they are for a central billing debtor (such as Coles & Woolworths) then the remittance from the head office has the stores listed and the invoices and an amount deducted from the bottom for A&P.

Create a A&P Sales Area, Stock Group & Stock Item.

On receiving claim from supermarket process a Credit Note for the Debtor

Sales Rep reports & commission impacted.

Flag Debtors According To Sales History

The Mail Order & Wine Club, Mail Order Totals History option allows you to *report* club members according to the sale date range and/or value specified.

Whereas these notes explain how to actually *flag* club members (Debtors) based on their sales history.

1. Create a report in the Sales Report Writer that will report the sales information you require.

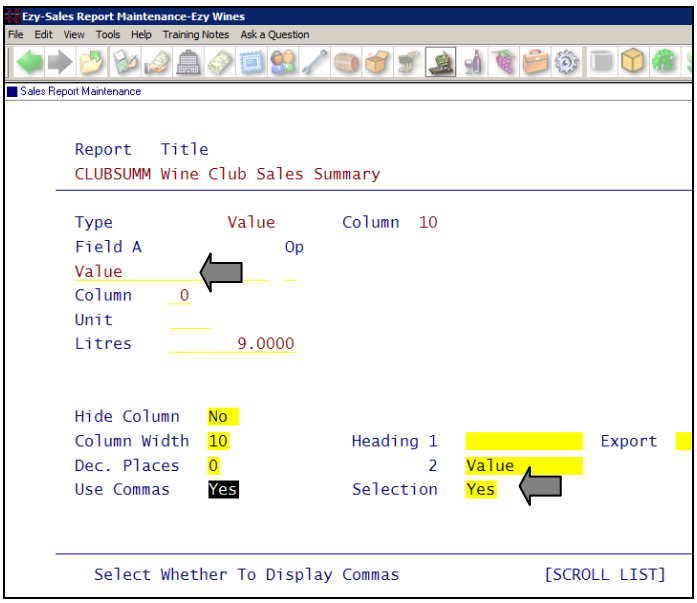
   In the example show, we are interested in the $ and cartons sales for specific date range.

Sales Ordering & Invoicing
Sales Report Writer
Sales Report Maintenance

Style
Select *By Date*.

Primary
Select *Debtor*.

Selection Criteria
Specify the selection criteria options that will assist in identifying the required customers.



Selection
Specify whether you want the column to also appear as a selection criteria option.

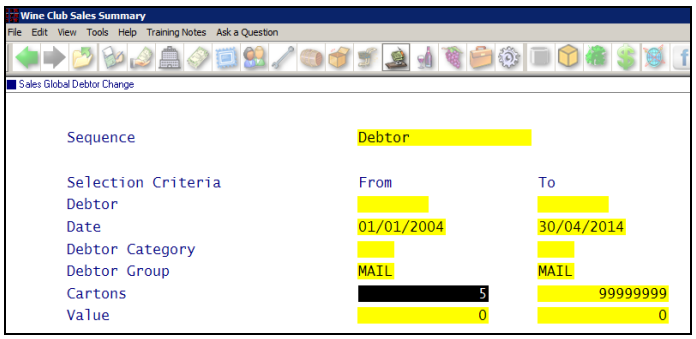
Flag Debtors According To Sales History (Cont'd)

2. Generate the report for the required selection criteria and confirm that the correct club members have been reported.

Sales Ordering & Invoicing
Sales Report Writer
Sales Report Generation

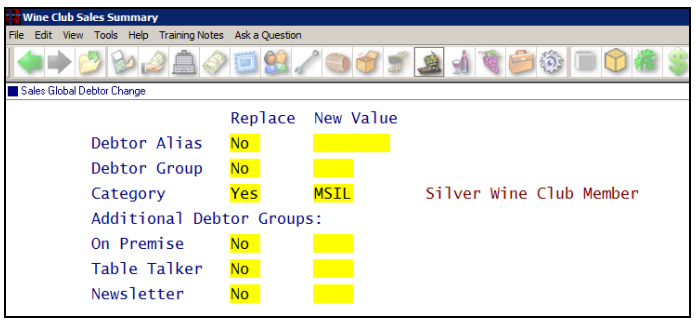
In the example shown, only club members that have purchased 5 or more cases since start of 2005 will be reported.



Sales Ordering & Invoicing
Sales Report Writer
Sales Global Debtor Change

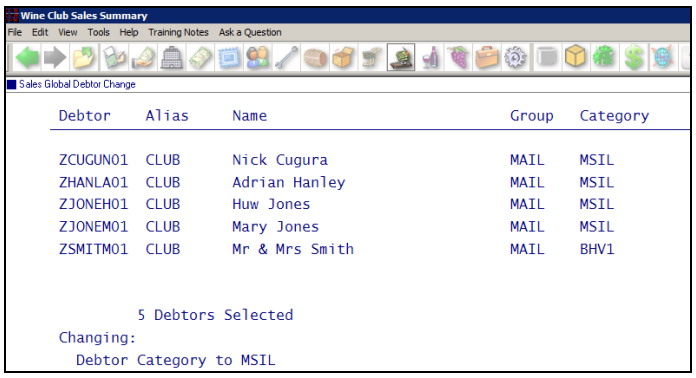
Select the report that will be used to determine which club members are to be impacted.

Utilise the selection criteria to fine tune which club members are to be impacted.



Only the following information recorded against Debtors can be changed;

- Debtor Alias
- Debtor Group
- Debtor Category
- Any additional Debtor Groups that have been setup.



In the example shown, the first 4 club members were already flagged *silver* and the last member will have their category changed to *silver*.

This option is also available on the A/R Administration menu.

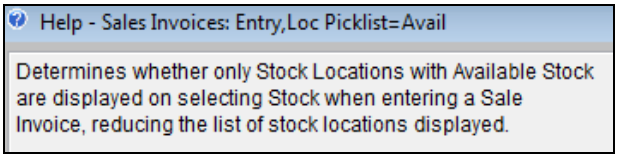
Identify Features Not Being Utilised

Are you utilising all the features available in each menu option?

On selecting a menu option, select the following button top right of the screen.

For details about a system parameter, on selecting a parameter when using the System Administration, System Parameters option, press [F10] or select the following button top right of the screen.



Prior to changing a system parameter

Utilise the System Administration, Copy Live To Test option to update the test database.

Change a system parameter in the test database and check the impact before making the change to the live database.

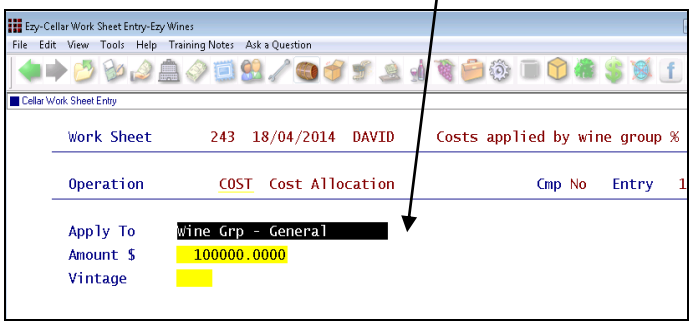
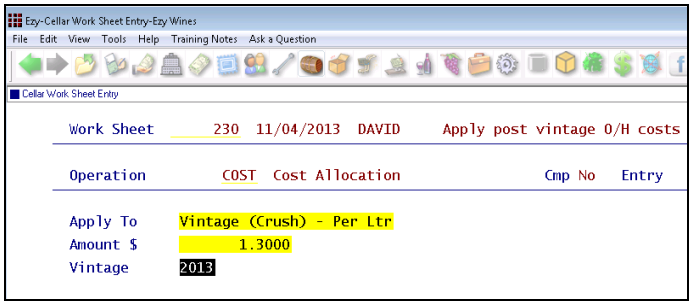
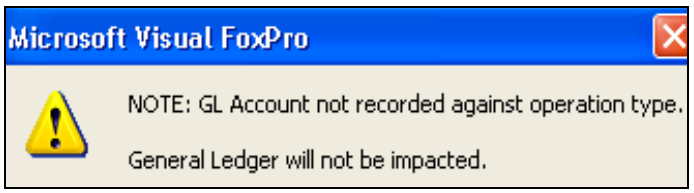
Cellar Reference Maintenance, Wine Groups





Vintage (Crush) – Per Ltr
The cost will only be applied to the component of the vessel(s) containing the specified vintage.

This operation should be considered after every vintage prior to any bottling or bulk despatch!



Note: If a GL A/C has not been recorded against the setup of the operation type, the GL will not be impacted and the bulk wine account will need to be adjusted via a journal.

Applying Bulk Wine Overhead Costs

The *Cost Allocation* operation type allows you to apply costs (such as monthly overheads) against wine in all or a selection of vessels.

Apply To

Selected Vsls – Per Ltr
The $/litre amount entered will be applied to the vessels selected.

All Vsls – Per Ltr
The $/litre amount entered will be applied to every vessel with a volume.

All Vsls – Total
The total amount will be distributed across every vessel with a volume.

Wine Grp – General
The total amount will be distributed across every vessel based on the general % distribution recorded against the wine groups.

Wine Grp – Deprec.
The total amount will be distributed across every vessel based on the depreciation % distribution recorded against the wine groups.

Zero Vessel Total
The cost recorded against each vessel selected will be set to zero.

Imp Wine – New Per Ltr
Imp Wine – Adj Per Ltr
Imp Batch – New Per Ltr
Imp Batch – Adj Per Ltr
The file to be imported simply needs to be a .csv with two fields (ie. wine batch and new cost, wine and new cost, wine batch and cost adjustment ***or*** wine and cost adjustment). This feature can be utilised to easily apply overhead costs periodically that are maintained in MS Excel.

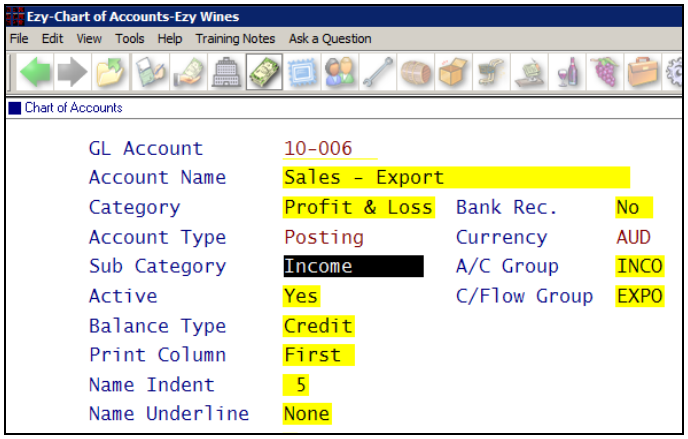
Note: *New* will simply overwrite the cost!

Before Updating

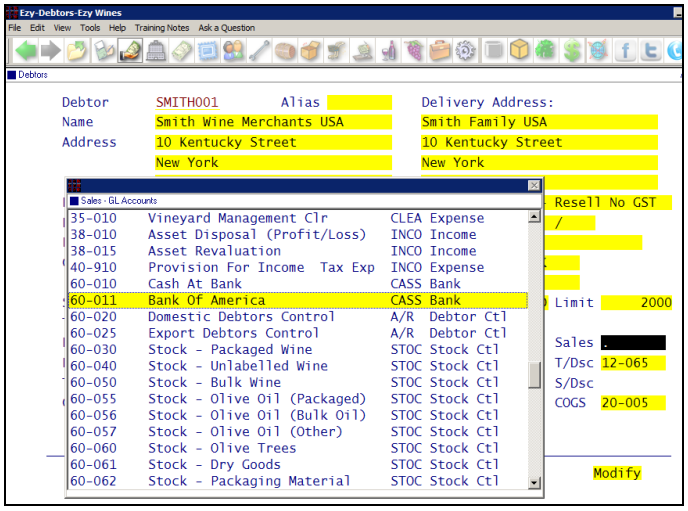
Check the cost distribution on the *Detail* format of the Cellar Work Sheet Listing before updating.

General Tips (Cont'd)

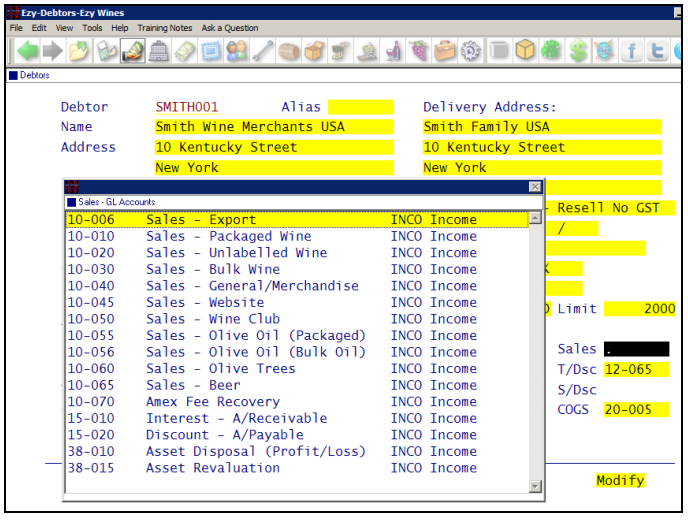
In the example below, the export sales account has been flagged with sub-category INCOME.



When the system parameter is set to No, any account can be selected.



When the system parameter is set to Yes, only income accounts are displayed in the picklist.



GL Account Sub-Category Validation

GL: Stop Entry If Incorrect Sub-Category

This system parameter should be set to Yes so as to ensure that only the appropriate accounts are displayed in GL picklists.

Note: On changing the setting of this parameter you need to log out and then log back in to activate.

Don't Preload Default Sales Credit Note Reason

Sales C/Notes: Entry, Use Default Reason
This system parameter determines whether the default credit note reason is preloaded against each item when entering a sales credit note.

Benefit

- As default reason is not preloaded, user more likely to enter the correct reason.

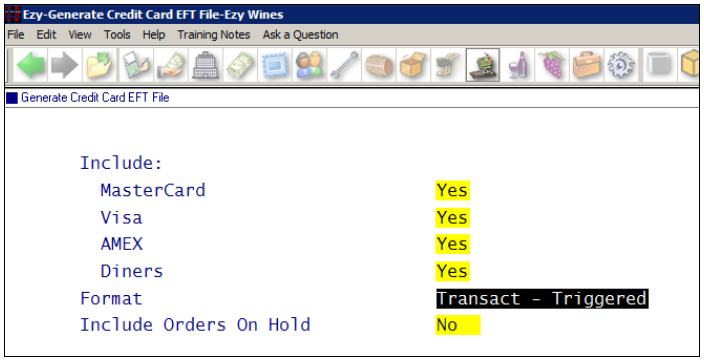
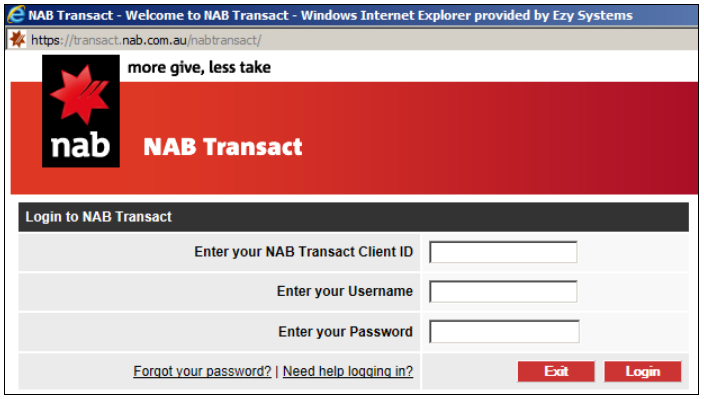
Credit Card Details Only Recorded At Bank

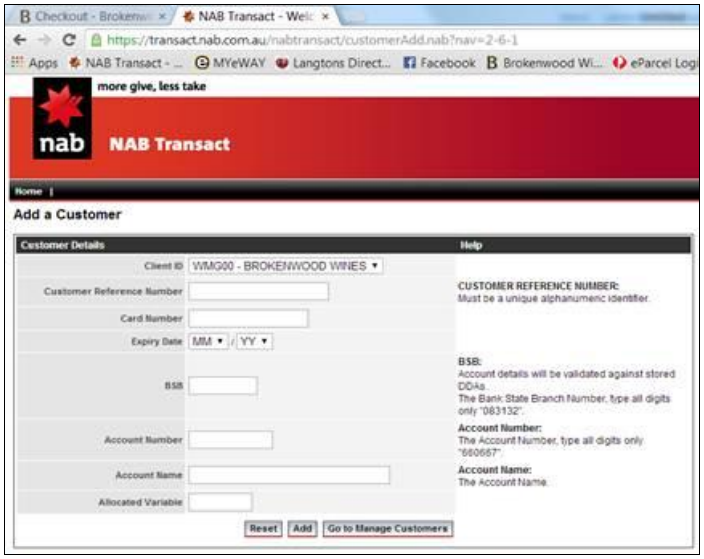
If you have internet banking, you *may* also be able to store customer's credit card details at the bank.

Members can be uploaded to the bank and managed as required. The Debtor code is used to identify the Debtor.

'Transact – Triggered' has been added to the Format options which excludes credit card details.







Benefit

- Provides more protection of customer's credit card details.

Mail Order & Wine Club
Generate Credit Card EFT File

Change Sales R.W. Report Code

New option.

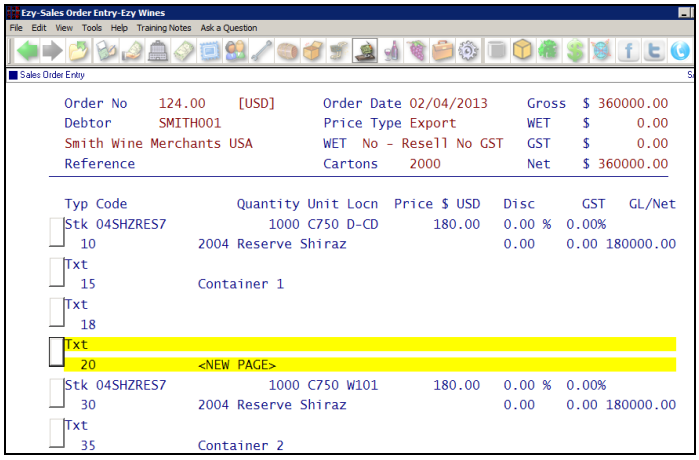
Benefit

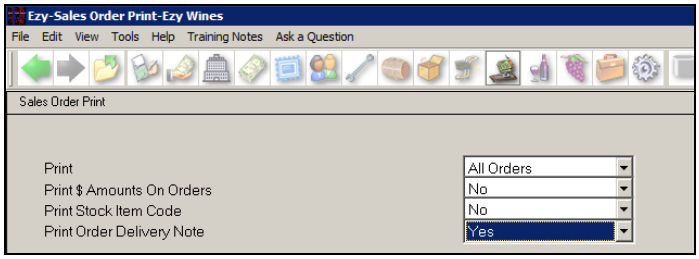
- Introduce standard coding convention so that it's easier to find reports.

Sales Administration
Change Sales R.W. Code

Print Multiple Delivery Notes For One Order

You can specify whether a sales order is to be printed as multiple delivery notes by indicating where the page break is to occur by entering a TXT line with <PAGE BREAK>.

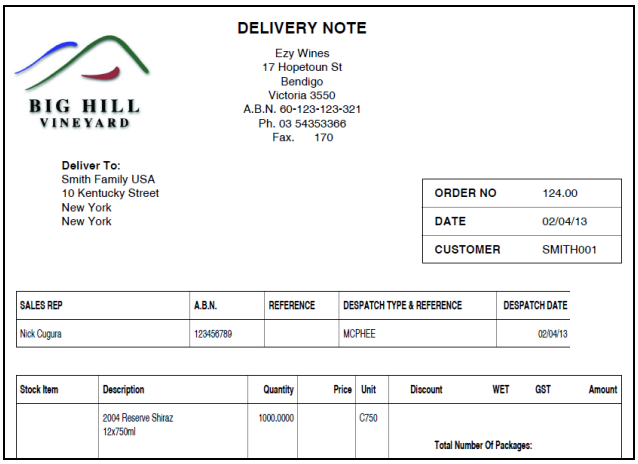




Benefit

- Ability to print multiple delivery notes where the one sales order consists of multiple shipping containers.

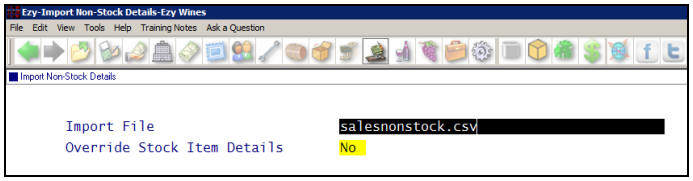
Sales Orders
Sales Orders (Delivery Note)



Import Non-Stock Items Including Text

Text recorded against non-stock items has been appended to the export file.

'Override Stock Item Details' prompt has also been added to the selection criteria, allowing you to specify whether you want to override information recorded against existing non-stock items.



Benefit

- Include text
- More flexibility.

Sales Administration
Import Non-Stock Details

Estimated Depletion Summary

When the same bulk wine stock item is recorded against multiple bottled (finished) stock items that belong to the same stock sales group, each finished stock item will be listed.

> ***Benefit***
>
> - Highlight that the bulk wine months remaining can be depleted by multiple bottled stock items.

W/Bridge: Bookings, Record Crush Docket

When system parameter "Cellar: Crush Recording Level" is set to 6, this new system parameter will determine whether crusher has to be specified when entering grower booking. When set to No, crusher will be required to be entered when recording the weighbridge docket.

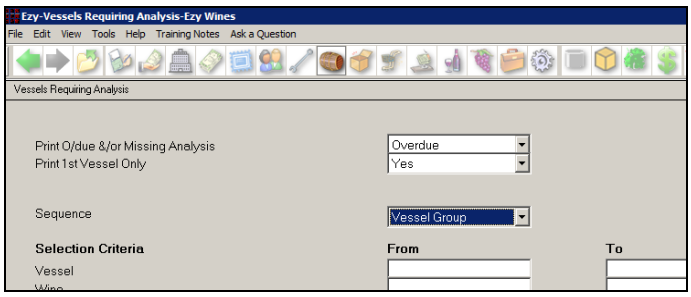
Benefit

- Additional option for Crush Level 6.

Weighbridge Operations
Grower Booking Entry

Vessels Requiring Analysis By Vessel Group

Vessel Group has been added to Sequence options.



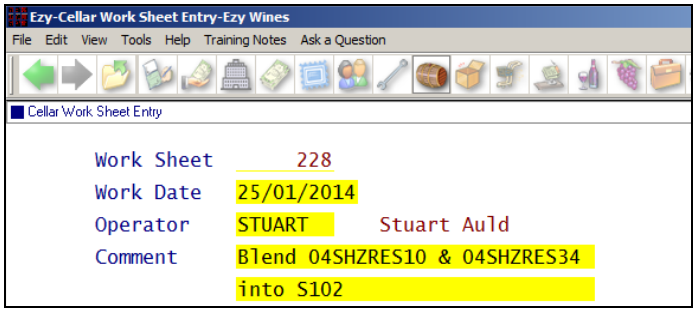
Benefit

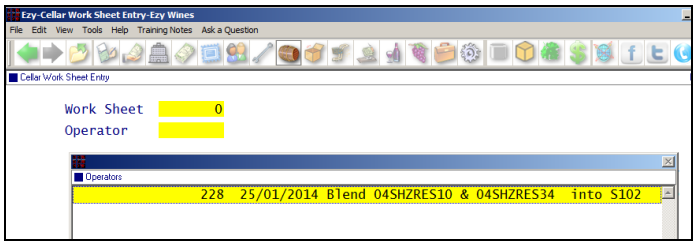
- Easily identify vessel groups of barrels requiring monthly or bi-monthly analysis.

Cellar Operations
Vessels Requiring Analysis

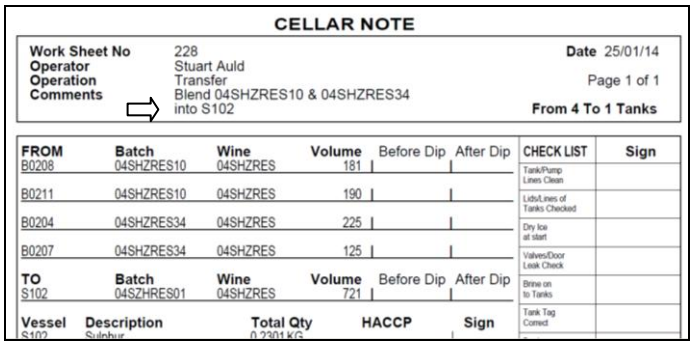
Cellar Note 2nd Comment Line

A second comment line has been introduced for cellar worksheets.

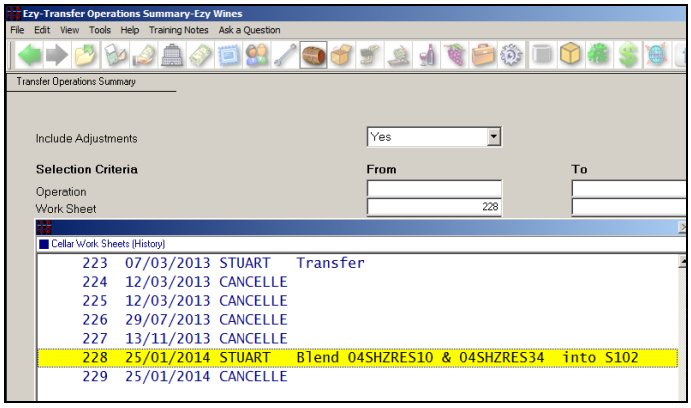




The work sheet pick list also includes the 2nd comment line.



If you have produced a customised version of the cellar work sheet docket, you will need to add the 2nd comment line in the Stationery Designer.



Every Work Sheet pick list on reports will include the 2nd line.

Benefit

- Include more instructions to appear in header of cellar note

SUMMARY

Wine Analysis Specifications
Allows analysis specification to be recorded/ reported against bulk wine, wine batch and bottled stock item.

It is available on the Cellar Reference and Bottling Reference menus.

It simply lists the analysis specifications entered.

Analysis sequenced alphabetically.

Pre-Bottling QC Form
The form can be customised using the Stationery Designer.

It is only available on the Cellar Operations menu.

The form will be printed for each **vessel** specified.

Analysis sequence determined by *Vessel* sequence number recorded against analysis types.

Bottled Wine Analysis Form
The form can be customised using the Stationery Designer.

It is only available on the Bottling Reference Reports menu.

It *doesn't* require a bottling run to be specified.

Analysis sequence determined by *Bottling* sequence number recorded against analysis types.

Bottling Run Analysis Form
The form can be customised using the Stationery Designer.

It is only available on the Bottling Operations menu.

It *does* require a bottling run to be specified.

Analysis sequence determined by *Bottling* sequence number recorded against analysis types.

Wine Analysis Specifications (Cont'd)

Wine Analysis Spec. Exceptions

This report will highlight wine in vessels with analysis that is not within its specification.
